

Vision for Careers

In careers lessons at St. Andrew's college, all of our students will receive the very best careers education possible with every student gaining access to the very best information, guidance and experiences available. Carefully planned, individualised lessons will be delivered with the sole intention of developing ambitious, independent learners ready to fully embrace employment, further education or training with passion, enthusiasm and confidence.

In careers lessons we carefully plan our curriculum to ensure that all of our pupils gain a rich and wide range of skills, knowledge and vocabulary, effectively built upon lesson on lesson, all in a safe and stimulating environment. We will provide learning opportunities by providing a diverse pool of activities such as, work placements, enterprise projects, volunteering, creating partnerships with business and industry across the region as well as operating alongside the Workbridge charity. Enjoyable enrichment events will be held regularly in the college to even further enthuse our pupils. These opportunities will aid our learners in gaining experience and develop key skills that are absolutely necessary for the world of work.

Careers and Vocational lessons are taught using the ASDAN programme and is reviewed and evaluated regularly to ensure provision is of the highest quality, relevant, up-to-date and in accordance with and guided by the core principles of the Gatsby benchmarks.
